Tech Stack: Vanilla JavaScript, CSS, HTML

Freelancing

March 2020~November 2020

Web Design: Executed captivating designs, showcasing creativity and attention to detail.

- As a freelancer, I worked with a range of clients with different needs.
- I helped clients identify the type of web application that best suited their requirements.
- Utilized JavaScript, SCSS/CSS, Bootstrap, and HTML to develop web applications.
- Created detailed and basic designs customized to each client's preferences.
- Enhanced my communication skills by effectively conveying technical concepts to clients.
- Gained practical experience in understanding and meeting client expectations.
- Adapted designs and development approach to suit individual client needs.

Programming Learning: Expanded expertise in various languages and frameworks. High School Teaching:

Empowered students in basic subjects, fostering curiosity and exam readiness.

Front-End Engineer | Sparsh Cargo Pvt. Ltd

November 2020~ September 2021

During my tenure at Sparsh Cargo Ltd, I had an amazing experience. Here are the key highlights:

- Created diverse basic templates for esteemed clients, leading to optimized operations and improved efficiency.
- Developed a new website design that enhanced user experience and made accessing our services effortless and enjoyable for customers.
- The visually captivating interface attracted more visitors and instilled trust in our existing clientele.
- Collaborated with other team members to discuss design-related matters and resolve any issues at hand.
- Worked closely with backend developers to integrate the developed designs into a functional and efficient database.
- Coordinated with designers to ensure the visual elements aligned with the overall design vision and goals.

Front-End Engineer | ADMYBRAND

November 2021~ February 2022

- Developed a specific part of the application using Next.js and TypeScript, demonstrating adaptability and a quick learning curve.
Implemented reusable components, enhancing code efficiency and promoting scalability.
- Resolved Git repository conflicts, ensuring a stable and functional master branch. Provided valuable feedback on API endpoints and design, actively engaging with team members and showcasing effective communication skills.
Fostered a collaborative work atmosphere by engaging with colleagues from various departments.
- Achieved significant milestones within a short time frame, highlighting commitment and determination.
- Technological Stack: TypeScript, Next.js, ReactJS, Tailwind CSS, Redux, GitHub.
As a Front-End Engineer at AdmyBrand, I made notable contributions by developing new technologies, resolving conflicts, and fostering effective collaboration within a startup environment
